

CNG COMPRESSOR

CNG Compressor is a key component in natural gas fueling systems. Engineered with an oil-free design for clean and safe high-pressure natural gas compression. Supplied with a proven track record in manufacturing and installation.

Oil Free Compressor

Specification

- ✓ Capacity: 100 Nm³/h – 15,000 Nm³/h
- ✓ Power: 10 kW – 1,250 kW
- ✓ Application: CNG vehicles
- ✓ Design: Oil-free type

Features

- ✓ 100% oil-free natural gas compression technology.
- ✓ Ensures clean gas transfer to vehicles without oil carryover.
- ✓ Eco-friendly design with zero waste oil generation.
- ✓ Hybrid compression system increases gas production efficiency.
- ✓ Reduced maintenance requirements and lower operating costs.
- ✓ Guarantees high-purity CNG for clean vehicle fuel applications.

Advantages

- ✓ 0 (Zero) ppm oil concentration in the gas.
- ✓ No oil condensation or buildup with low operating temperature.
- ✓ Reduced maintenance costs for compressors and vehicles.
- ✓ Low-noise operation: 85 dB
